

Mobile marketing

SMS messages

SMS advertising allows to personalize advertising messages by providing instant and personalized information.

Within minutes the subscriber receives sms, for example, about shop discounts or exits and entrances of bank accounts.

In order to carry out the delivery you are required to provide us your database of numbers or you can use our already-defined database, which has detailed filtration in different directions (gender, age, place of residence, profession, salary, etc.).

1

*The database provided by you must be based on the customer numbers you have previously agreed to.
